

ED/CED Coating Solutions

A dynamic group of engineers & surface coating experts with vast experience in the field of coating technology formed 360 Degrees Industrial Coatings with the vision to be the leader amongst ED/CED Job work providing companies, where excellence is a minimum requirement and customers are always delighted

ABOUT US

Management Team:

360 Degrees Industrial Coatings is formed with the passion and Vision of Mr. Sameer Chaudhary & Mr. Sunil Kumar. With a cumulative experience of over 25 years between them, they share a common mission to grow markets with innovative solutions & services and create value for all stake holders by providing high quality ED/CED coating solutions to our customers.

Sameer Chaudhary:

An engineering graduate of Delhi College of Engineering, he has prior experience of working in India's leading MNC's in Pre-sales & Business development function, before quitting to start his own distribution company dealing in Industrial Coating like CED Paint, Powder Paint as well as imported Industrial Equipments – both manual & Automatic.

Sunil Kumar:

A surface coating expert and owner of the Shree Krishna group, Mr Sunil Kumar has been in the Industrial Coatings job work business since the past 12 years where in he has successfully managed to carve out a niche for his company. In the year 2010, a CED plant was setup in Faridabad serving to the needs of the coating industry.

INFRASTRUCTURE

Spread over 7000 sq feet of covered area, we have installed some of the most technologically advanced machines to churn out the best quality coating solutions with a high level of productivity and efficiency.

Our fully PLC controlled unit is dust free and comprises state-of-the-art machines & equipment. Our qualified team ensures that all these services are performed to perfection.

We deploy a 11 stage PT process, followed by Epoxy CED coating with two ultra filter stages. The products are then thermal cured for finishing.

With an ED Tank capacity of over **4000 Liters**, the plant is capable of coating an area of **1,60,000 square Inch / hour**.

A team of engineers is our backbone and aids in high quality coating of products.

Following are the important features we have:

- Fully PLC controlled unit
- Two transporter system (1ton capacity)
- Baking Oven
- Dedicated Lab Setup with complete testing
- SCADA Control – Coming Soon
- Own RO/DM plant – Coming Soon

Solutions for
INDUSTRIAL
COATINGS

QUALITY ASSURANCE

Quality is never an accident; it is always the result of intelligent

We at 360 Degrees Industrial Coatings believe to manage our 4M's (Man, Machine, Material, Method) through 3C's (Communication, Co-ordination and Co-operation). Quality for us is not an additional function but a part of the set process that we have defined for ourselves.

The highest level of quality standards is maintained in all of the processes and procedures. Utmost importance is given on maintaining the optimum level of quality at all levels from raw material testing, patrol and stage inspection to final inspection. The latest machineries are used in all of the processes. In-house facilities have enabled it to maintain quality standards in all the processes. State of the art testing and measuring equipments ensure perfect quality of all the products.

Lab Equipments:

- pH Meter, Conductivity Meter
- DFT Meter, Gloss Meter
- Weighing Balance
- Impact Test Apparatus
- Salt Spray Chamber
- Lab Oven
- Titration equipments
